

Make your device more comfortable

Try one adjustment at a time. Keep what helps and undo what does not.

kindred click · Checked October 5, 2026

☐ **Choose one everyday task**

What would help: reading a message, following audio, tapping controls or typing?

☐ **Try larger text**

Use Settings search for text size or font size. Test a familiar app after changing it.

☐ **Explore captions**

Check the app's captions or your device's supported Live Caption options. Confirm important details another way.

☐ **Learn before changing controls**

Read start, practice and stop instructions before enabling a screen reader or voice control.

☐ **Review privacy and extra costs**

Voice features have different data practices. Built-in software does not include a free device, accessories or service.

☐ **Keep the person in charge**

Ask permission, explain how to undo the setting and let the person choose what works.

Features vary by model, software, language and region. Automatic captions and speech recognition can be wrong. This is not medical advice.

Sources & review

Source check: October 5, 2026. These links go to the original publishers; listing a source is not an endorsement. Device steps were checked against these manufacturer guides, not tested on your physical device. Menus vary by model, software version, language and region.
